

Lymphoreticular system: The thymus is small and tan. The spleen weighs 230 grams. The capsule is intact and the parenchyma is free of change. Lymph node enlargement is not noted. There is a 1 cm, accessory spleen present.

Endocrine system: The pituitary is of normal size, and left in-situ. The adrenals are of normal size, have thin yellow cortices, and gray medullae. The thyroid contains a moderate amount of colloid and is of normal size, shape and consistency.

Urogenital system: The combined weight of the kidneys is 310 grams. The cortical surfaces are smooth. The medullary pyramids are pointed. The calyces, pelves, and ureters are free of change. The bladder is contains 200 cc of urine. The mucosa and wall are free of change. The prostate is rubbery and of normal size. The testes are left in-situ.

Musculoskeletal system: The muscles are red brown and firm. No fractures are noted.

Central nervous system: The scalp, skull, dura, leptomeninges, and cortical surface of the 1,200 gram brain show no evidence of trauma. Cut section reveals no abnormalities within the cerebral hemispheres, pons, cerebellum, midbrain or medulla.
